NANCY SHARMA

JAVA FULL STACK ENGINEER

☎ 8839671420 | Email | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, with foundational knowledge of Core Java, Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), and Database Management Systems (DBMS). Hands-on experience in developing responsive web applications using HTML5, CSS3, JavaScript, and Node.js, along with working knowledge of SQL databases, Git, and GitHub. Familiar with software development fundamentals, problem-solving, debugging, and collaborative project development. Eager to apply programming skills and build scalable, maintainable full-stack applications while contributing to backend and frontend development in a Java-based engineering environment.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, JavaScript
Data Structures and Algorithm: Understanding and implementation of fundamental DSA concepts using Java, including arrays, strings, linked lists, stacks, queues, trees, graphs, recursion, sorting, searching, hashing, and dynamic programming.
Web Development: HTML5, CSS3, JavaScript, Responsive Web Design, DOM Manipulation, Node.js
Databases: MySQL, Oracle, SQLite, MongoDB, SQL Queries, CRUD Operations, Database Management Systems (DBMS)
Developer Tools: Git, GitHub, IntelliJ IDEA, Visual Studio Code, Jupyter Notebook, Google Colab
Data Analysis: MS Excel, Google Sheets, Data Cleaning, Data Preprocessing, EDA, Feature Engineering
Machine Learning: Regression, Classification, Clustering, Model Evaluation, Cross-Validation, Hyperparameter Tuning
Deep Learning: PyTorch, TensorFlow, Keras, CNN, RNN, Explainable AI (SHAP)
Frameworks & Libraries: Scikit-learn, NumPy, Pandas, SciPy, Matplotlib
Data Visualization: Power BI, Tableau, Matplotlib

ACADEMIC PROJECTS

Thread & Tale - Custom Embroidery E-Commerce Website

Designed and developed a responsive e-commerce platform for customized embroidery products, featuring product listings, design customization, shopping cart, and order management. Built the backend using Java 21 and Spring Boot, implementing business logic and RESTful APIs for product, customer, and order operations. Integrated Spring Security for customer authentication, login, signup, and role-based authorization, with Spring Data JPA, Hibernate, and PostgreSQL for database management. Planned integration of Razorpay for online payments and Cloudinary for product image and embroidery artwork storage. *Technologies:* Java 21, Spring Boot, Spring Security, REST APIs, Spring Data JPA, Hibernate, PostgreSQL, HTML5, CSS3, JavaScript, Bootstrap 5, Maven, Git, GitHub, Postman

Netflix Clone - Responsive Streaming Platform UI

Designed and developed a responsive streaming-platform user interface inspired by Netflix using HTML5, CSS3, and JavaScript. Implemented structured web layouts, interactive UI elements, and dynamic content behaviour to enhance user experience and frontend functionality. Applied responsive web design, DOM manipulation, and JavaScript event handling to improve interface usability across different screen sizes. *Technologies:* HTML5, CSS3, JavaScript, DOM Manipulation, Event Handling, Responsive Web Design, Frontend Development, UI Development

QR-Based Restaurant Menu & Ordering System

Developed a QR-based digital restaurant menu that enables customers to scan a QR code, browse menu items, select dishes, and place orders through an interactive web interface. Implemented order management, dynamic item selection, automatic bill calculation, and total price generation using JavaScript to streamline the digital ordering workflow. Designed a responsive user interface using HTML5 and CSS3, integrating QR code functionality to simplify menu access and reduce reliance on manual order taking. *Technologies:* HTML5, CSS3, JavaScript, QR Code Integration, DOM Manipulation, Event Handling, Order Management, Dynamic Billing, Responsive Web Design

AI-Assisted Pneumonia Detection from Chest X-rays: Developed CNN and ResNet50-based models for automated pneumonia classification from chest X-rays. The CNN achieved 88.78% test accuracy, with *95.90%* pneumonia recall, 0.9609 ROC-AUC, and 0.9757 average precision, outperforming ResNet50 on the evaluated metrics. *Tools: Python, PyTorch, CNN, ResNet50, Deep Learning, Image Processing*

EDUCATION

B.Tech. — Computer Science & Engineering (AI & ML)	*LNCT University, Bhopal*	2023–2027 | *CGPA: 7.95*
12th Standard	*Government Excellence School, Shivpuri | MP Board*	2021-2022 | *87%*
10th Standard	*Kids Garden School, Shivpuri, MP | CBSE*	2019-2020 | *71%*
